---

Andrew,

I received this in email last night from Sylvia Andress. As it's regarding service level policy, I think it should be circulated to the entire board and the management team.

Norbert

Evening Norbert.

I am writing in the hope that you may consider maintaining the level of service, regarding the ability of our firefighters, when it comes to an "interior attack". My concern is that if they are unable to maintain this level of training, when a human rescue needs to be performed, the firefighters will be unable to execute it.

Thank you for your time.

Sylvia Andress.
